

PROBLEM STATEMENT

A medicine reminder app designed for people who frequently forget to take their medications. An app is built for the caretaker which enables him to set the desired time and medicine. You may also keep track of your appointments. Its parental feature distinguishes it from other apps on the market, allowing you to keep track of and remotely assist your loved ones who find it difficult to utilize such an app with their reminders. The device will receive the medicine name and modify the user with voice command.

CUSTOMER PROBLEM STATEMENT:

>> I am Ashwin,

Age-48

I have low sugar and high blood pressure.

>> I am trying to:

remind to take injectable glucagon for low sugar And enalapril, lisinopril, perindopril and ramipril for high bp

>>But :

lifestyle challenges, patient incompatibility, forgetting of medicine use, and nonexpert advice.

>>Because:

Due to patient Forgot, it will risk health of patient .

>>Which makes me feel:

Worry about patients health for careless of taking medicine due to forgotten .
