BRAINSTORM & DEA PRIORITIZATION

Date	5 October 2022
TeamID	PNT2022TMID41455
Project Name	Personal Assistance for seniors who are self-reliant
Maximum Marks	4 Marks

DEFINE PROBLEM STATEMENT:

Senior citizen or Elders may often fail to consume their medication whether it was from for getting to take the medicine, from taking medicine at the wrong time or even from taking too much medicine. Therefore, the family members or caretaker has to remind them to take the pills on time. So, we have focus on those elders who having difficulty to take medication on time independently. You may also keep track them.

BRAINSTORM:

GROUP IDEAS:

- The Smart IoT Gadgets should accompany the elder ones to remind their pills or vaccine on the time independently.

- All IoT device should monitor the elder whether the haveconsumemedicineornot and make record.
- All IoT device should monitor Medicine name, Strength, dose and everything &these things should be displayed.
- This IoT application should alert tore fill the medicine.

PRIORITIZE:
